

## IFIS-Online-Colloquium

The Institute for Integral Studies invites you to the **IFIS Online Colloquium n° 10**:

<b>Time:</b>	Wednesday, <b>December 13, 2017</b> , at <b>20.00-22.00 h</b> , Zoom meeting.
<b>Presenter:</b>	<b>Dr. Nikolaus von Stillfried</b> , IFIS and Phenoscience Laboratories, Berlin
<b>Topic:</b>	<i>Explorations of Possible Connections between Quantum Physics and Consciousness</i>

### Details

Ever since the beginnings of quantum theory, there has been an intuition that somehow the mystery of quantum physics and the mystery of consciousness are somehow related. For the last few years, I have investigated a number of these kind of hypotheses and developed some ideas myself. Since in 2017 we celebrate the 100th birthday of David Bohm, in my talk I will focus in particular on his proposal, which I find very promising and exciting.

### Short bio of the presenter

Dr. phil. Nikolaus von Stillfried (\* 1978) studied Biology and Neurosciences at the universities of Munich and Cambridge. He earned his PhD in Cultural Sciences at the university of Frankfurt/Oder with a theoretical and empirical study on the generalizability of quantum theory and the limits of experimental methodology in consciousness studies. He is currently completing his Post-Doc (Habilitation) project in philosophy on connections between consciousness and quantum physics. He says: "One of the biggest fascinations and miracles for me is the fact that we are conscious. Hence I have spent a lot of time exploring consciousness introspectively and experientially, and thinking about consciousness scientifically and philosophically. Starting out with university studies in neuroscience I have over time moved more and more into philosophy, where I am now just about to complete my habilitation."

*Note: The Colloquium will be held in English.*

**If you wish to participate, please register with us by **December 10** at [info@ifis-freiburg.de](mailto:info@ifis-freiburg.de).**

Registered participants will receive the Zoom invite upon registration.

### More info on the IFIS Online Colloquium:

The main **intent of our Colloquium** – in line with [IFIS' general mission and purpose](#) – is to help connect interested integrally oriented researchers and practitioners by offering them a forum to exchange experiences around innovative approaches to complex social challenges. The colloquium is designed to strengthen the dialog and connection between IFIS' members and friends, mostly spread out in different countries and even continents. We also hope to attract new colleagues to join us and be part of IFIS' community of [integral research and inquiry](#).
